Dear Mr Oakeshott,

Congratulation on your considered decision to support the Gillard Government.

I wish you every success in implementing the reforms you have in mind & hopefully this parliament will demonstrate what can truly be achieved through consensus for the people of Australia.

The labour government has brought us through the GFC with flying colours & understandably the GFC took precedent over other policies in the previous government. Now is the time to revisit some of those policies & have them implemented.

Although the press is reporting a wave of ill feeling towards you in this electorate I want you to know that there are plenty of people I know who are very relieved at your decision.

I will certainly be voting for you next time around

Yours sincerely

Susan McPhee
